

Grades 3-5 Science Safety Agreement

Scientists know they must work safely when doing experiments. As a student scientist, you need to be careful when doing Science activities, too. Read the following safety rules and sign the form. Take the form home and have your parent fill out the bottom half and sign it. Bring the form back to your teacher so that you can start experiencing the activities that your teacher has planned for you and your Science class.

I will read the activity carefully before I start.

I will listen to the teacher's instructions. I will ask questions about things I do not understand.

I will wear safety goggles when needed.

I will keep my work area neat and clean. I will clean up spills correctly and immediately.

I will handle sharp items, glass, and other equipment carefully.

I will use chemicals carefully.

I will help keep plants and animals that I work with safe and healthy.

I will tell my teacher if I have an accident or see something that looks unsafe.

I will put materials away when I am finished.

I will dispose of chemicals properly as per my teacher's instructions.

I will wash my hands well when I am finished.

I agree to follow the Science safety rules. _____

Student Signature

I have read and discussed this safety agreement with my child. My child has the following needs that should be considered during some Science activities:

My child wears contact lenses:	Yes	No
My child is colorblind:	Yes	No
My child has allergies:	Yes	No

My child is allergic to : _____

My child has (other): _____

Parent/Guardian Signature
